CARE AND CLEANING

Cleaning the griddle after each use will avoid accumulations of flammable grease, fats, and other debris. Some debris and residue may remain on the griddle.

Note: The griddle will discolor due to exposure to high temperatures (this is normal).

CAUTION: Allow for the griddle to completely cool prior to cleaning.

- Never flood a hot griddle with cold water. This can cause griddle warping.
- DO NOT allow grease to accumulate on the griddle or in the drip tray.
- After each use, clean the griddle:
  - wipe down with a cloth and remove all food residue
  - use a spatula to scrape any excess food into the drip tray
  - use a soapy water mixture and scrub with a scouring pad to help remove cooked-in food
- After each use, carefully remove the drip tray then empty and clean it.
- If any cleaning agents are used, they MUST be removed/cleaned with soap and water prior to future use.
- Store griddle inside grill cabinet or in another dry location.
