**1-Safety**

**CAUTION:** WHEN INSTALLING AND OPERATING THIS APPLIANCE, ALL INSTRUCTIONS AND WARNINGS IN YOUR OWNER’S MANUAL MUST BE OBSERVED. FAILURE TO DO SO MAY RESULT IN A FIRE OR EXPLOSION CAUSING PROPERTY DAMAGE, BODILY INJURY, OR DEATH.

This grill must be installed in accordance with local codes and ordinances, or, in the absence of local codes, with either the latest National Fuel Gas Code (ANSI Z223.1/NFPA 54), and Natural Gas and Propane Storage and Handling Installation Code (CSA-B149.1).

This appliance and its individual shut-off valves must be disconnected from the gas-supply piping system when testing the system at pressures in excess of 1/2 psig. This appliance must be isolated from the gas-supply piping system by closing its dedicated manual shut-off valve during any pressure testing of the gas-supply system at pressures up to and including 1/2 psig.

This grill is designed for outdoor use only. DO NOT use this grill inside a building, garage, or enclosed area (see paragraph below). DO NOT use this grill in or on a recreational vehicle or boat.

A minimum 5 foot clearance is required between the cooking surface and the overhead construction. When installed under combustible overhead construction, the area above the cooking surface of the grill must be covered with an exhaust hood. The exhaust hood provides the protection for the combustible overhead construction.

**3-Installation**

**Location**

Locate the grill on a flat level surface. Refer to the INSTALLATION REQUIREMENTS section of your grill owner’s manual for complete details.

**CAUTION:** Wind blowing into or across the rear oven lid vent (Fig. 3-1) can cause poor performance and/or dangerous overheating. Orient the grill so that the prevailing wind blows toward the front of the grill (Fig. 3-2).

**CAUTION:** To prevent dangerous overheating, the rear of the unit must have a minimum clearance of 4” from any non-combustible wall.

**Connect Gas supply**

These quick start instructions assume a propane cylinder configured unit. See main instructions for natural gas or household propane configured units.

Place approved propane 20 lb cylinder in tank tray and lock holder in position (Fig. 3-3).

Connect quick coupler hose and regulator supplied with unit to propane cylinder (Fig. 3-4).

Connect Gas supply

**INCORRECT**

![Fig. 3-1](image2)

**CORRECT**

![Fig. 3-2](image3)

Turn all burner control knobs to the OFF position. Open the main cylinder valve. Then carefully check all gas connections for leaks with a brush and half-soap/half-water solution before lighting. NEVER USE A MATCH OR OPEN FLAME TO TEST FOR LEAKS.

Proper grill airflow must be maintained as shown in Fig. 3-5.
4-Grill Setup
Parts Placement Checklist
Place the following items according to their position and orientation in Fig. 4-1:
Flavor grids, cooking grids, backburner cover (if equipped), warming rack, and meat probe.
Leave pre-installed E-burners in place to maintain proper alignment.

Backburner Cover (if equipped)
Hook the backburner cover over the top of the backburner to protect the backburner from grease, dust and dirt when it is not in use. Remove cover before use.

Warming Rack
The warming rack comes pre-installed. Remove zip ties before use. Consult the owner's manual to remove or replace.

Shelf/Sideburner (if equipped)
Align the four (4) holes in the shelf with the four (4) holes in the side of the cart while aligning and engaging the burner venturi with the orifice (Fig. 4-2). Insert the four (4) screws (provided) into the side of the cart while aligning and engaging the burner venturi with the orifice (Fig. 4-2). Insert the four (4) screws (provided) into the holes and tighten. Make the igniter wire connection as shown in Fig. 4-2.

IMPORTANT: See your grill owner's manual for complete installation details.

5-Test
Note: This unit must be connected to 120VAC power for electronic lighting.
1. Open lid(s) or remove cover(s) from burner(s) to be lit.
2. Turn all gas control knob(s) to their OFF position(s).
3. Turn on the gas at its source.
4. Depress the desired control knob for 5 seconds, then, while pressing turn it counterclockwise to the HI LIGHT position. Once the burner lights, release the knob.
5. Repeat step 4 for each additional burner to be lit.

CAUTION: If a burner does not light within five (5) seconds of turning on the control knob, depress the knob and turn it to the OFF position. WAIT FIVE (5) MINUTES before repeating step 4. If you smell gas, follow the instructions on the cover of the grill owner's manual. If the burners still do not light after several attempts, refer to the grill owner's manual for manual lighting.

6-Propane and Natural Gas Safety
IMPORTANT: READ AND FOLLOW ALL WARNINGS PROVIDED WITH THE PROPANE-GAS CYLINDER.
READ ALL SAFETY INSTRUCTIONS AND WARNINGS REGARDING THE USE OF PROPANE GAS FOUND IN YOUR OWNER’S MANUAL. FOR NATURAL GAS READ ALL SAFETY INSTRUCTIONS AND WARNINGS FOUND IN YOUR OWNER’S MANUAL.

7-Routine Maintenance
Your grill must be serviced and maintained properly to ensure optimal performance, appearance, and safety. The grill must be cleaned as often as twice a month (depending on use) to prevent grease build-up and other food deposits. See owner’s manual for details.
